

Why

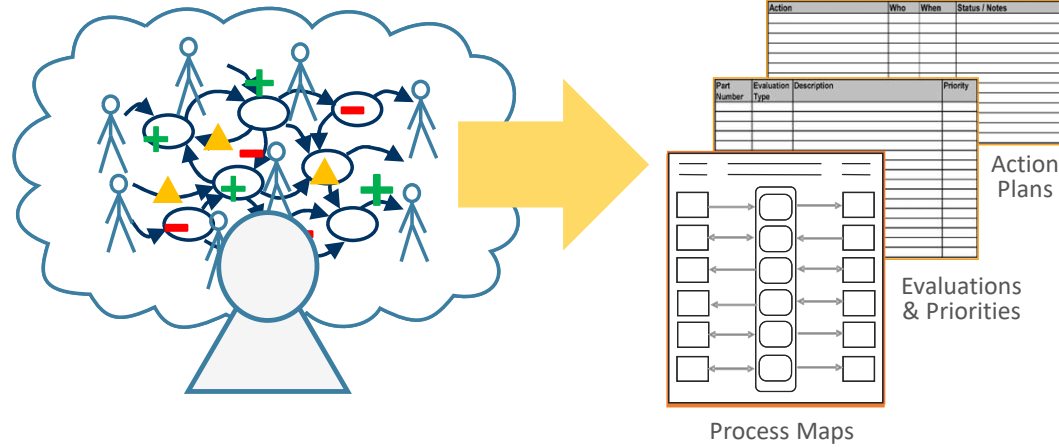

Map Your Job

with the free
Map Your Job! training

Introduction, Short Version and Deep Dive

*First, a brief
introduction to
Map Your Job!*

**Map Your Job! quickly and easily
transfers what you know about your job
from your knowledge to pencil & paper**

**making *YOUR* job knowledge better organized,
so you can think and communicate about
your job more easily and effectively**

WHERE DOES IT HELP

to be able to think and communicate about
your job more easily and effectively?

It helps in all these activities that add value to your job

- Improving your satisfaction with your current job
- Reducing stress in your current job
- Preparing for advancement in your job track and/or career
- Learning a new job
- Understanding alternative jobs inside or outside your current company
- Researching for a job interview
- Being more confident in a job interview
- Having more stories to tell at a job interview
- Being able to convey more detail in a job interview

Plus, mapping your job teaches you a valuable skill that helps in all these areas as well

- Recruiting
- Orientation
- Training
- Coaching
- Productivity improvement
- Workload balancing
- Flex work scheduling
- Remote work coordination
- Teamwork through better shared knowledge of team's jobs
- Leadership through better understanding of team's jobs

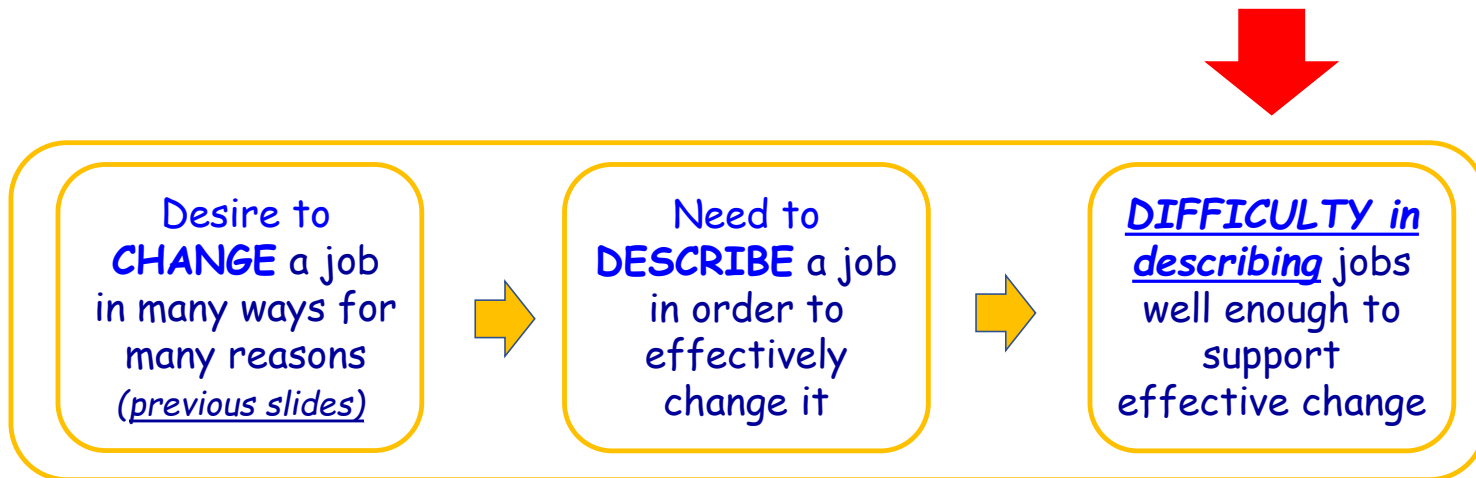

Because all these areas depend on understanding individual jobs

What you need to learn this skill and Map Your Job

- 5 to 10 pieces of letter-size paper
- A pencil
- An eraser
- **What you already know, think and feel about your job**
- Ability to draw basic shapes
- Ability to write short phrases
- Ability to follow basic instructions

*Eye-opening results in as little as
an hour of getting started*

What is the pain point?

- **Widespread dissatisfaction with jobs**
- **Unmet needs** for:
 - Productivity improvement
 - More teamwork
 - Enhanced leadership
 - Accelerated innovation

All of which depend on the **ENGAGEMENT** that comes with job satisfaction

What is the solution?

Quickly learn and apply a new skill

Eye-opening results in as little as an hour

Desire to **CHANGE** a job in many ways for many reasons
(previous slides)

Need to **DESCRIBE** a job in order to effectively change it

Map Your Job!
method for quickly creating detailed "job maps"

- **Increased satisfaction with jobs**
- **Increasing capability for:**
 - Productivity improvement
 - More teamwork
 - Enhanced leadership
 - Accelerated innovation

Supported by **Stronger Ability to Describe Jobs** provided by **Map Your Job!**

Background Story

The "Map Your Job!" method is a simplified version of the ActionMap® Toolkit™ method for process change, development and improvement

ActionMap has been used in over 100 workshops with organizations including those shown here:

HP	Target	Chevron	GAP	ConAgra
Kaiser Permanente	Intel	SoCalGas	National Semiconductor	
San Francisco Chronicle		City of Fairfield	City of San Leandro	
Placer County Water Agency		Alameda Unified School District		

The Core Training slide deck at the link below provides you with all the instructions you need to learn and apply the same method used in those workshops to Map Your Job!

howtomapyourjob.com

Next, a deeper dive on
Why Map YOUR Job
with
Map Your Job!

The "Why" story starts with
Process Knowledge

"Knowledge about planned and/or repeated patterns of action, that is, knowledge about processes"

Process Knowledge

is the most valuable resource on the planet

Because all other resources depend on it
to perform work that creates consumer value

Try removing process knowledge, and see what happens

How does that relate to Map YOUR Job?

- Your job, any job, has many processes, formal and informal, that are needed for the job to produce value
- All such processes require process knowledge to operate
- Take out the process knowledge and see what happens
- So a major part of changing your job means changing the processes in your job
- Which means changing YOUR PROCESS KNOWLEDGE of your job

What does THAT mean, and how to do it?

There are two major categories of
Job-Related Process Knowledge

- ***Experiential*** Knowledge
 - what you can DO in your job
- ***Descriptive*** Knowledge
 - what you can DESCRIBE about what you can do

*Descriptive knowledge is what you use
to think and communicate about your job*

Quick exercise on types of job knowledge:

Think about how long
it would take you
to tie a pair of shoelaces

That's using
Experiential knowledge

Now think about
how long it would take you
to describe how to tie
a pair of shoelaces

That's using
Descriptive knowledge

Now consider the difference between *performance* knowledge and *descriptive* knowledge as it relates to everything you know about your job

“Job Knowledge” includes tasks, values, ideas and plans

Experiential Knowledge
(just tie them)

Descriptive Knowledge
(describe how to tie them)

Everything you know about your job, both what can do and what you can easily describe

The Value of Descriptive vs Performance Knowledge

- We all possess *an amazing amount of knowledge* of how to do our jobs
- At the same time we have **much more performance knowledge** than we have *descriptive knowledge* of our jobs
- Experiential knowledge is critical to *learning and doing* a job
- Descriptive knowledge is needed to effectively *change* a job, by thinking and communicating about it

"Job Knowledge"
includes tasks, values,
ideas and plans

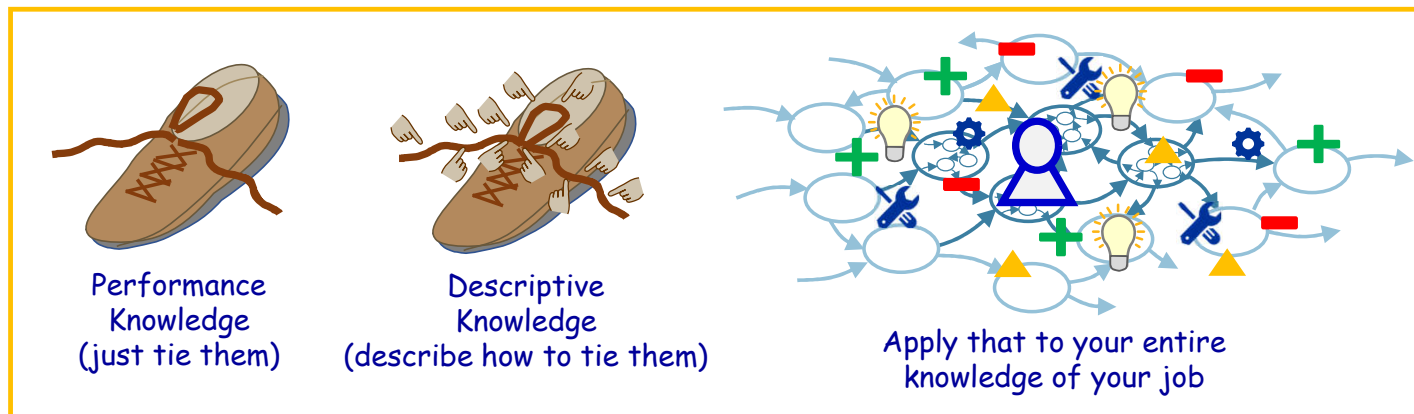

(Repeat)

Specific ways that **increased ability to think and communicate about** a job can increase personal and organizational value

- Improving your satisfaction with your current job
- Reducing your stress in your current job
- Preparing for advancement in your job track and/or career
- Learning a new job
- Understanding alternative jobs inside or outside your current company
- Researching for a job interview
- Being more confident in a job interview
- Having more stories to tell at a job interview
- Being able to convey more detail in a job interview
- Recruiting
- Orientation
- Training
- Coaching
- Productivity improvement
- Flex work scheduling
- Workload balancing
- Remote work coordination
- Improving teamwork by sharing team member's job knowledge
- Improved leadership by better understanding the team's overall workload
- **Add your ideas**

Questions to consider, given the above uses of descriptive job knowledge:

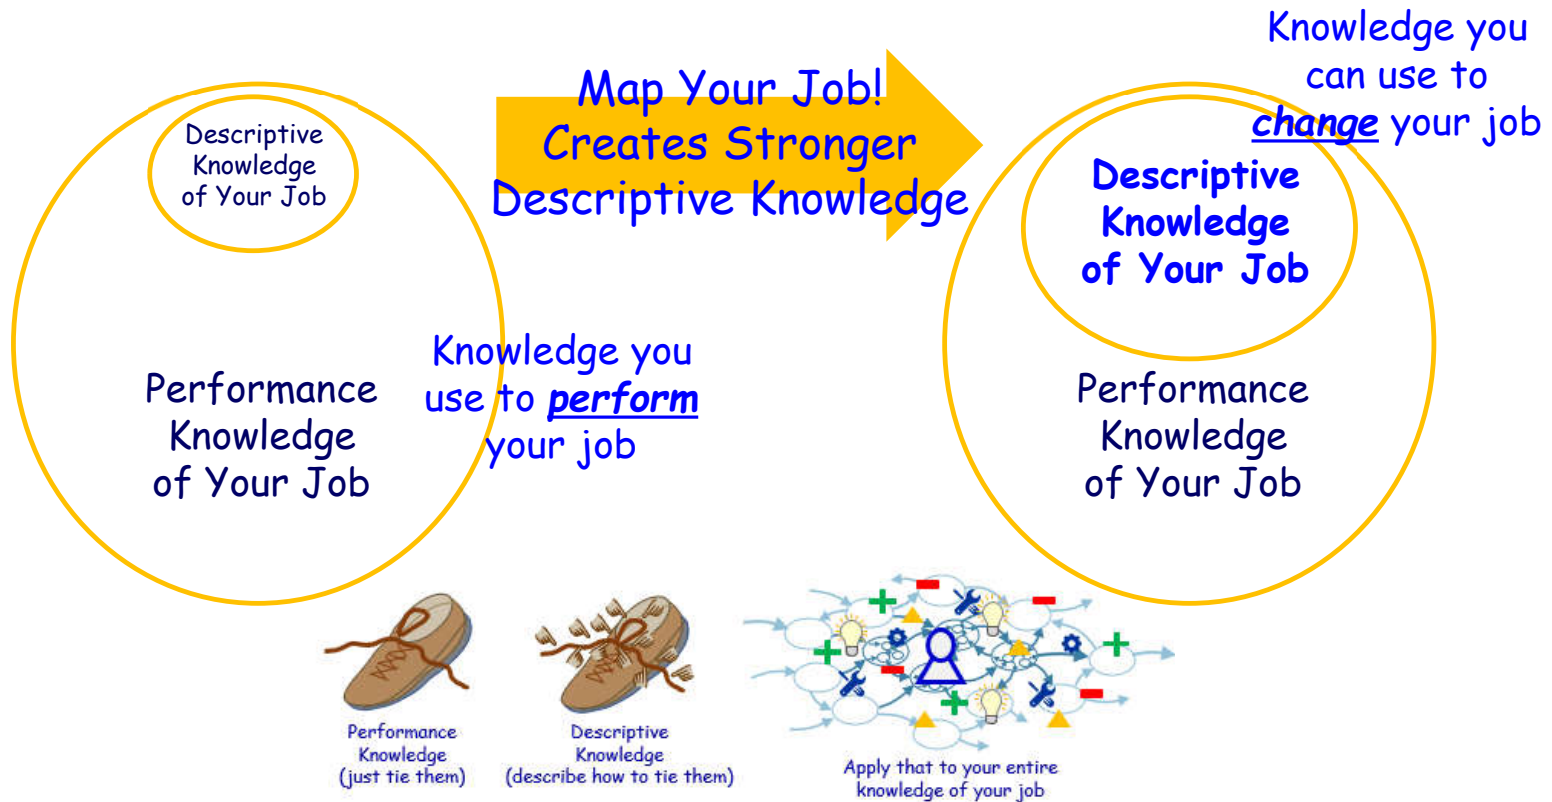

- What is it like to **not have enough** descriptive knowledge of your work? (For instance, in a job interview)

- What are the **benefits and advantages** of having **stronger** descriptive knowledge of your job?
- What **methods** are you aware of for **increasing** your descriptive knowledge of your job?

Map Your Job!

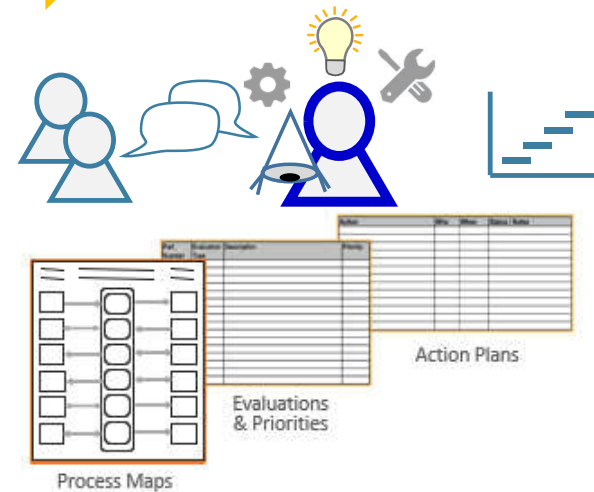

turns *performance* knowledge into *descriptive* knowledge,
giving you greater ability to think and communicate about your job

Performance
